Online store

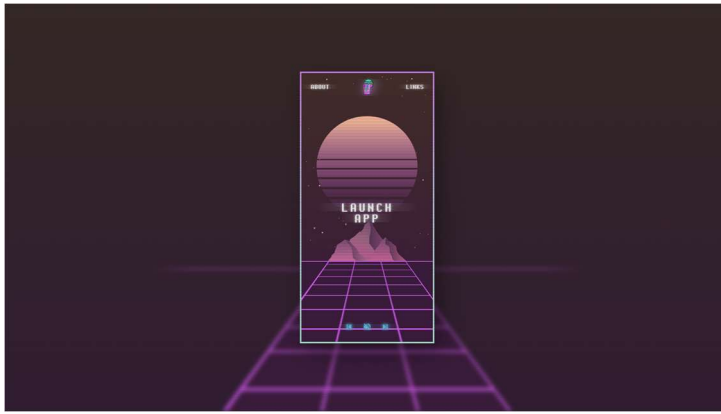

I personally like this design cause of the retro style of all these websites. Especially since these websites bring back the vibe of the 70's and 80's

For this one I personally like the retro synthwave style of the site while it looks like an operating system. It looks like the original dos which really inspires me for the look of the website.

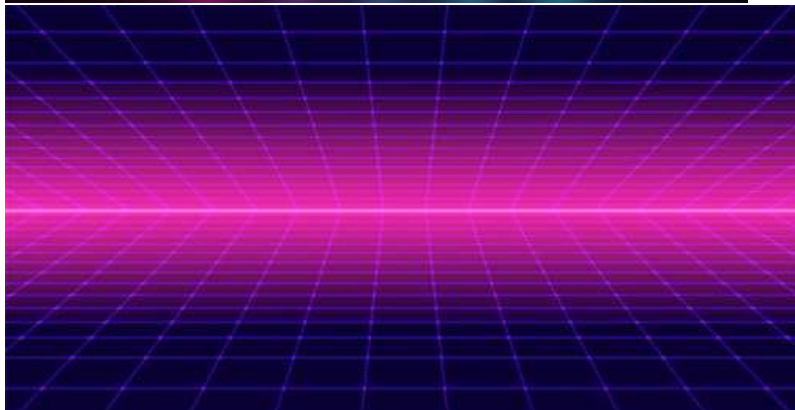

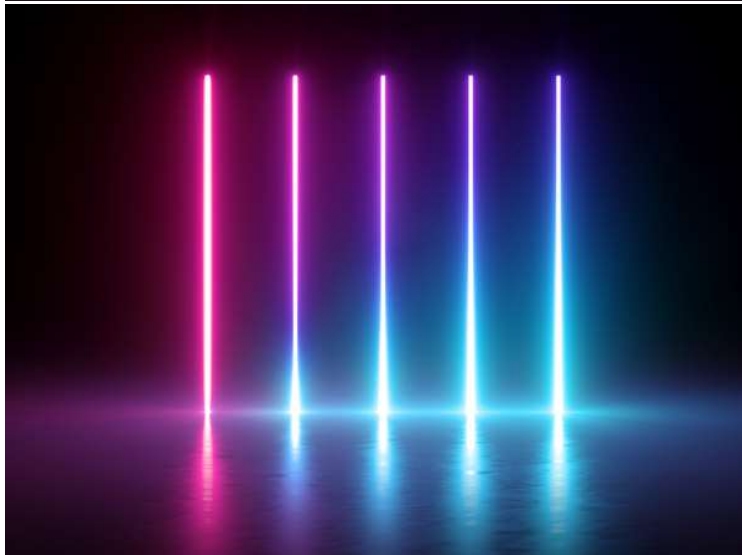

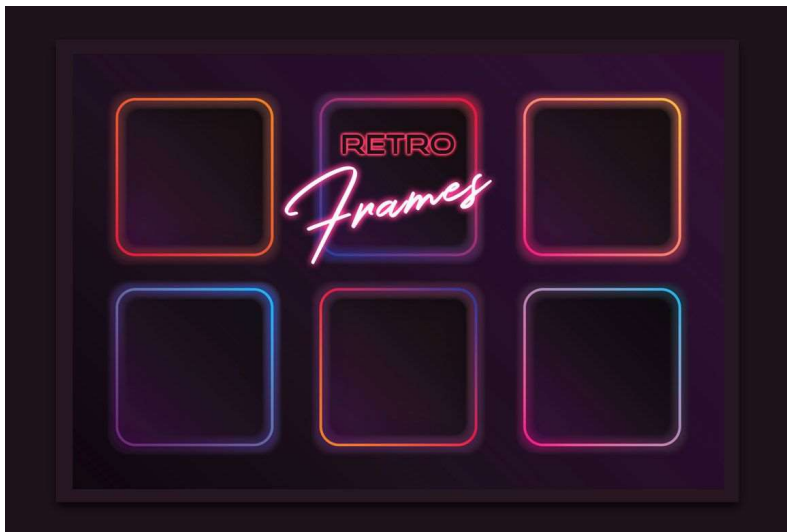

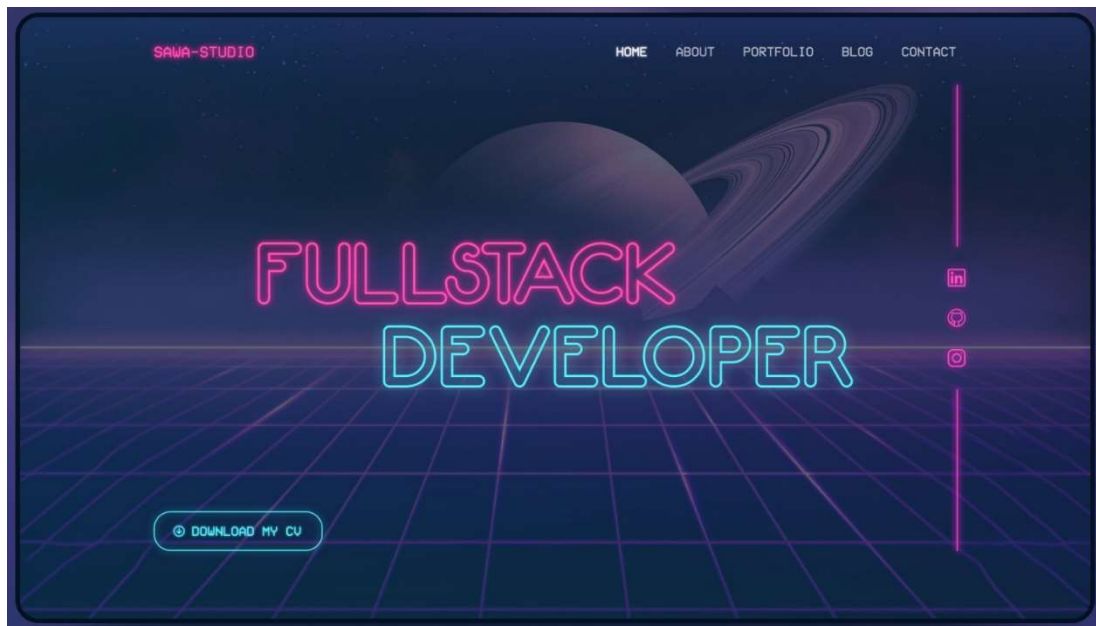

This brings back a style of apple to the web while still looking like an operating system. Even the icons keep the same feel.

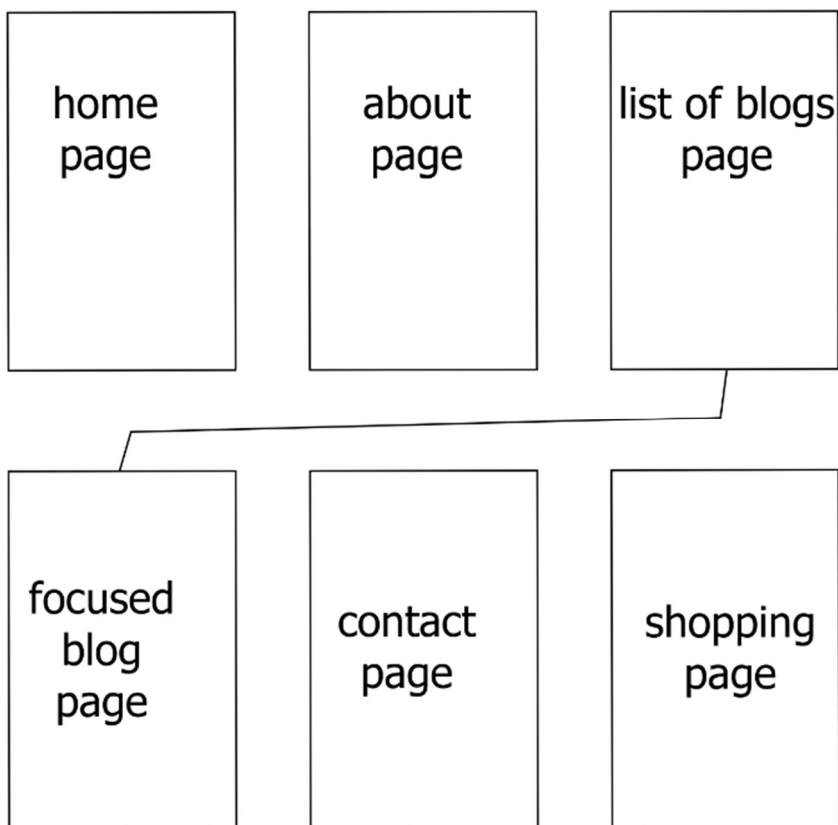

This one although very simple, I like it for the fact that it looks like it belongs on a phone. Other than that the website looks like an application showcase.
